# DIEGO CALDERÓN FLORES

## SOFTWARE DEVELOPER

### ABOUT ME

I'm a software developer engineer with experience in different areas of my career, I already have 4 years of work experience, in which I have worked on a variety of projects as a tester in the QA area and as a developer.

### PROFESSIONAL BACKGROUND

#### Tester - QA

EXOS | May 2018 - 2021

- Experience in the design and implementation of tests for software products
- Experience using test automation tools
- Experience in software documentation

#### Developer

EXOS | September 2021 - present

- Experience in back-end software development using Spring and GraphQL technology, Java Server Faces, among others.
- Server maintenance experience
- Front end implementation with VUE and Quasar
- Technical leader in project development
- Analysis of customer requirements and implementation of these
- Experience in the financial sector, providing services to clients such as Eglobal, Mastercard and FOVISSSTE

### ACADEMIC RECORD

#### UTEZ

Técnico Superior Universitario | 2018 - 2020

- Focused on development and management of software
- Average: 9.0

#### UTEZ

Engineering | 2020 - 2022

- Focused on the reinforcement of technical knowledge as well as the collection and analysis of customer requirements, reinforced in the periods of "estadias" (business period)
- Average: 9.4

# WORK EXPERIENCE

---

## EXOS TECHNOLOGY

### WORK EXPERIENCE

At Exos, I worked in two specific areas. Firstly, as a QA Tester from 2020 to 2021, where I developed testing skills for the software the company was developing. I also handled documentation and created user manuals. Additionally, I ventured into test automation using SmartBear's TestComplete tool.

As a developer from 2021 to 2023, I was involved in various projects, gaining knowledge in areas mentioned on the first page. I was responsible for creating databases, developing microservices, and, when necessary, integrating these APIs with the frontend.

Over time, I transitioned from a developer to a Technical Lead. In this role, in addition to my development responsibilities, my duties expanded into more administrative tasks. This included initial client consultations, creating work plans, measuring timelines and risks, and coordinating tasks for everyone in my team.

Our main client is Eglobal, but I also provided support on projects with other clients such as Mastercard, ISSSTE, among others.
