About me

I am a Software Development and Management Engineer. I graduated in 2022, but I have been immersed in the professional field since May 2020. Throughout my career, I have worked in various areas of my field, from QA tester to taking on developer roles, and currently serving as a Tech Leader.

Skills and abilities

- Java.
- Javascript.
- Springboot.
- Springbatch.
- PostgreSQL.
- MongoDB.
- Git.
- AWS.
- React.
- Vue.
- HTML.
- CSS.
- NodeJS
- GraphQL
- Teamwork.
- Proactive.
- Communication skills.
- English language C1.
- Ease of learning and adaptation.

Professional background

EXOS TECHNOLOGY

QA Tester | May 2020 - October 2021

IT company, software development (payment methods)

Responsible for software testing, documentation and test automation.

JR Developer | September 2021 - December 2023

IT company, software development (payment methods)

While working as a Junior Developer, I acquired numerous skills to enhance both my technical expertise and professional capabilities. I gained experience in developing multiple microservices using Spring Boot, implementing batch solutions, and leveraging Kafka for improved performance when batch processing alone wasn't sufficient. You can find detailed examples of these projects in my portfolio, which I encourage you to explore.

Tech Leader | January 2024 - Present

IT company, software development (payment methods)

I transitioned from a Junior Developer to a Tech Leader to further expand my knowledge and take on greater responsibilities. In my new role, I not only continue to write code but also oversee the entire lifecycle of projects. This includes involvement in each phase, from analysis and design to implementation, testing, and maintenance. My background as a QA tester and developer has equipped me with valuable skills that I can leverage in my role as a Tech Leader.

Academic record

UNIVERSIDAD TECNOLÓGICA EMILIANO ZAPATA

Bachelor Software development and management engineer
(average of 94)

DURATION

- September 2018 - June 2022
